SmartTrack Health – Enterprise EVV, Scheduling & Agency Management System

PROJECT NAME:

SmartTrack Health – Enterprise EVV, Scheduling & Agency Management System

PROJECT OVERVIEW

Design a **fully separated, enterprise healthcare workforce management system** with:

1. SuperAdmin (Master Control Console)
2. Billing Console (System-level finance)
3. Agency Admin Portal
4. Staff Portal (Employee System)

Each must be:

- Fully isolated navigation
- Separate role-based permissions
- No cross-session visibility
- No shared navigation
- Independent dashboards

System must support:

- EVV (Electronic Visit Verification)
- Scheduling accountability
- Clock-in/out compliance
- Missed punch correction workflow
- Staff discipline tracking
- Agency oversight
- SuperAdmin system control
- Billing & subscription management

Design must be:

- SaaS-level professional
- Healthcare compliant
- Enterprise dashboard UI
- Highly structured
- Data-driven

Use:

created with craft

- Clean enterprise UI
- Accessible color system
- Component-based design system
- Consistent grid (12-column desktop)
- Proper empty states
- Status indicators (Green / Red / Gray)
- Error, warning, success states

🔷 USER ROLES (DO NOT OMIT ANY)

1️⃣ **SuperAdmin (Master Control Console – Root Level)**

2️⃣ **System Owner (Highest Privilege)**

3️⃣ **Billing Admin (Billing Console)**

4️⃣ **Agency Owner**

5️⃣ **Agency Admin**

6️⃣ **Scheduler**

7️⃣ **HR Manager**

8️⃣ **Supervisor**

9️⃣ **Staff (Caregiver / Field Employee)**

Each must have:

- Dedicated Navigation
- Dedicated Dashboard
- Dedicated Permissions
- Restricted visibility

🔵 FULL END-TO-END FLOWS PER USER

1️⃣ SUPERADMIN CONSOLE (MASTER CONTROL)

created with craft

Navigation:

- Dashboard
- Agencies
- Agency Verification
- System Logs
- Global EVV Logs
- Platform Analytics
- System Configuration
- Role Management
- Billing Overview
- Subscription Control
- Audit Logs
- Security & Permissions
- Feature Flags
- API & Integrations
- Support Tickets
- Notifications
- Settings

Full Wireframe Flow:

A. SuperAdmin Login

- Email + Password
- 2FA
- IP validation
- Failed attempt state

B. Dashboard

Widgets:

- Total Agencies
- Active Staff Count
- Total Shifts Today
- Total EVV Logs Today
- Pending Agency Approvals
- Platform Revenue

created with craft

- System Alerts

Charts:

- Shift Activity
- EVV Compliance %
- Revenue Growth
- Agency Growth

C. Agency Management Flow

1. View All Agencies
2. View Agency Details
3. Approve / Suspend / Disable
4. View Agency Staff Count
5. View Agency EVV Logs
6. View Agency Billing Status
7. Lock Agency Account

Include:

- Search
- Filters
- Status badges
- Export

D. Global EVV Monitoring

- Live Clock-ins
- GPS Location View
- Suspicious Activity Flags
- Late Clock-in Alerts
- Missed Punch Analytics

E. Audit Logs

- Who did what
- Timestamp
- IP
- Action Type

created with craft

2️⃣ BILLING CONSOLE

Separate login.

Navigation:

- Billing Dashboard
- Subscription Plans
- Agency Subscriptions
- Invoices
- Payment Logs
- Refunds
- Failed Transactions
- Revenue Reports
- Tax Settings
- Stripe Integration
- Settings

Full Billing Flow

1. Create Plan
2. Assign Plan to Agency
3. Generate Invoice
4. Process Payment
5. Auto Suspension if unpaid
6. Payment failure notifications
7. Re-activate upon payment

Include:

- Monthly/Annual toggle
- Discount management
- Overdue alerts
- Payment retry logic

3️⃣ AGENCY ADMIN PORTAL

created with craft

Navigation:

- Dashboard
- Staff Management
- Scheduling
- EVV Logs
- Correction Requests
- Shift Approvals
- HR & Documents
- Reports
- Notifications
- Settings

Full End-to-End Staff Addition Flow

1. Click "Add Staff"
2. Enter:
    - Name
    - Email
    - Phone
    - Role
    - License Info
    - Certifications
3. Assign Department
4. Assign Supervisor
5. Assign Permissions
6. Send Invite
7. Staff Receives Email
8. Staff Sets Password
9. Staff Completes Profile
10. Status: Active

States:

- Pending Invite
- Active
- Suspended
- Archived

---

created with craft

Scheduling Flow

1. Create Shift
2. Assign Staff
3. Define Client
4. Define Location
5. Define Time
6. Publish

Staff receives:

- Accept / Reject

Status Colors:

- Green = Accepted
- Red = Rejected
- Gray = No Response

EVV Correction Workflow

1. Staff misses clock
2. Staff submits correction
    - Select shift
    - Select missed action
    - Add reason
3. Supervisor reviews
4. Approve / Reject
5. Audit trail stored

No auto correction allowed.

4️⃣ STAFF PORTAL

Separate Login.

Navigation:

- Dashboard
- My Schedule
- Clock In / Clock Out

created with craft

- EVV History
- Correction Requests
- Tasks
- Notes / Handoff
- Documents
- Profile
- Notifications

Clock-In Flow (EVV)

1. Staff opens shift
2. Click Clock-In
3. GPS auto capture
4. Timestamp auto
5. Confirmation screen

Clock-Out:

- Same flow
- Require task completion confirmation
- Add notes

Missed Punch Flow

1. Go to Correction
2. Select shift
3. Choose:
    - Missed Clock-In
    - Missed Clock-Out
4. Add explanation
5. Submit

Status:

- Pending
- Approved
- Rejected

---

created with craft

🟢 STATUS SYSTEM

Use color tokens:

- Green: Accepted / Approved
- Red: Rejected / Denied
- Gray: Pending
- Yellow: Warning
- Blue: Informational

🟡 PERMISSION LEVELS

Create access types:

- Full Access
- Moderated Access
- Limited Access
- Read Only
- Restricted Access
- EVV Only Access
- Scheduling Only Access

Each role must define:

- View
- Create
- Edit
- Delete
- Approve

🧩 DESIGN SYSTEM REQUIREMENTS

Create:

Components:

- Buttons (Primary, Secondary, Danger)
- Modals
- Tables

created with craft

- Data Cards
- Status Badges
- Tabs
- Dropdown
- Multi-step Forms
- Alerts
- Toast Notifications
- Pagination
- Filters
- Charts
- Sidebar Navigation
- Top Header
- Search Bar
- Role Badge

📊 REPORTING MODULE

Each portal must include:

- Shift Report
- Attendance Report
- Compliance %
- Staff Performance
- Missed Punch Count
- Payroll Export
- Billing Summary

Include:

- Export to CSV
- Filter by date
- Filter by staff

🔐 SECURITY REQUIREMENTS

Design:

- 2FA screens

created with craft

- Role isolation
- Session timeout
- Account lock after failed login
- Permission denied screen
- Audit trail UI

📱 RESPONSIVENESS

Design:

- Desktop first
- Tablet optimized
- Staff Portal mobile first

🚨 EDGE CASES TO DESIGN

- Staff no GPS signal
- Double clock-in attempt
- Clock-out without clock-in
- Shift overlapping
- Subscription expired
- Agency suspended
- Correction rejected
- Invalid schedule

Include:

- Error states
- Warning banners
- Disabled button states
- Empty states

📦 FINAL DELIVERABLE STRUCTURE IN FIGMA

Create:

1. Design System File

created with craft

2. SuperAdmin File
3. Billing Console File
4. Agency Admin File
5. Staff Portal File
6. Prototype Flows Connected
7. Interaction animations
8. States (hover, active, disabled)

Use:

- Auto Layout
- Components
- Variants
- Organized naming convention

🎯 FINAL GOAL

Deliver a:

- Fully separated
- Enterprise-ready
- Compliance-focused
- EVV-integrated
- Billing-enabled
- Role-isolated
- Scalable healthcare workforce system

Do not omit any role.
Do not combine portals.
Ensure full separation.
Design for production-level SaaS deployment.
